Key : m – missed, w – wrong, f - found.

Organisers comments – Patricia Davies

Organising this event proved to be rather less straightforward than I had initially thought. Poor Malcolm had just finished planning all his courses when the land agents told me we couldn't use the moor! Malcolm took the news calmly, we decided to use two maps and I heaved a sigh of relief – until two days before the event when I discovered we were sharing the forest with a vintage car rally, all their spectators and a sponsored walk! Still, the weather made up for all the problems occurring prior to the event and I hope everyone enjoyed themselves both in the forest and sunbathing in the picnic area afterwards.

Many thanks to a marvellous team of helpers who really did excel themselves – thanks to Gerry, Bob, Lyn and Barbara on registration; Margaret and family, Simon and Andrew on start (and ran!), Don (and his computer), Alan, Margaret, Linda, Nick and David on finish / results; Margaret for the string course and Brian who did lots too.

Thanks must go to Malcolm for a marvellous job as planner and to Gillian as controller.

Planners comments – Malcolm McIvor

Too easy I heard many of you say, with the possible exception of brown course competitors. But that is the message I prefer to get because I'm sure it will mean that you will come again and perhaps attempt the next grade of course.

As you probably are aware the competition area had to be changed at relatively short notice at the request of the shooting tenant who was concerned at the late nesting of the birds due to the cold spring. This meant that all my early planning which took virtually all the courses on to the moor was for nothing and I had to start again.

There is very little left of the once glorious mature forest at Low Redford so the longer courses had to venture into a neighbouring area which unfortunately was mapped at a different scale to the Cabin Hill area. I hope this did not spoil the competition for you and I apologise for the long run from the start to the master maps for these competitors.

Despite reports from some short course competitors, there were no punches missing at controls when I came to collect them in. For blue course competitors I am pleased to say that control 10 (93) in the re-entrant was correctly placed. The one slight problem with it was that the re-entrant should perhaps also be described by the higher contour as well as those below. The controller confirms this.

Congratulations to all those who attained the colour grades.
